

# Dr Katherine Maddox

BSc, D.Clin.Psy., MSc, QiCN

## Clinical Neuropsychologist

My specialist interests include cognitive rehabilitation, working with anxiety disorders and using Acceptance and Commitment Therapy to help people adjust to living life with a neurological condition. I have worked in later life mental health, memory clinics, general neuropsychology, including traumatically acquired brain injury, and currently have a specialist role working in neurosurgical services with people with brain tumours, epilepsy and colloid cysts.

## Experience

### Associate Clinical Neuropsychologist specialising in Neuropsychology

**Newby Psychological Services Ltd**

January 2021 - present

In my role with Newby Psychological Services I am primarily providing neuropsychological rehabilitation and therapy to support those affected by acquired brain injury and conducting capacity assessments.

### Clinical Neuropsychologist (8B)

**Salford Royal Foundation Trust**

2019 – present

I work primarily in the neuro-oncology service providing neuropsychological assessment and therapy to patients with brain tumors. I also work as part of the surgical MDT to provide intra-operative neuropsychological assessment and input to patients during awake craniotomies.

My role includes general neurology outpatients with patients with a range of neurological problems including brain injury, epilepsy and dementia.

### Clinical Neuropsychologist (8A)

**The Walton Centre, Liverpool**

2014 – 2019

My role involved providing neuropsychological assessment to clients with a wide range of neurological problems including dementia, epilepsy, Multiple Sclerosis and head injury. I provided assessment and psychological formulation for clients presenting with functional problems such as non-epileptic attack disorder (NEAD).

Providing psychological (CBT and ACT) and neuropsychological intervention for people with a range of presentations.

### Clinical Psychologist (Band 7 and then 8A)

**Manchester Mental Health and Social Care Trust**

2008 – 2014

Within this service I worked primarily in the memory clinic and later life CMHT providing neuropsychological assessment and treatment to more complex clients and evidence based psychological therapy for older adults and carers.

I led a service development associated with nurses offering basic neuropsychological testing to aid early diagnosis Consultation and supervision to the team and psychology assistants / trainees.

Working primarily in Older Adult CMHT and Physical Health, including patient with diabetes, renal failure and who had experienced an amputation.

Led a service development offering psychological assessment to all older adult inpatients, with a view to enhancing wellbeing and rehabilitation.
