

Dr Lorraine Haye

BSc Hons, PGCert, PGDip, D.Clin.Psy., FHEA, SRCN

Consultant Clinical Neuropsychologist

I have several years' experience working within neurorehabilitation across different settings ranging from acute to community. As such, I am experienced in providing care tailored to the different priorities and changing needs at each stage of someone's rehabilitation journey. I enjoy working directly with individuals as well as the system around them in order to maximise connection to what is most important to each individual.

I am an accredited neuropsychologist and also trained to advanced level in a range of therapies which means I have a good understanding of different approaches to a wide range of mental health and neuropsychological difficulties. I'm particularly interested in the ways that psychological difficulties can manifest physically in the body and relate to existing physical health conditions. Also, how relational patterns can inform adjustment and coping to a long-term health condition. I enjoy supporting multidisciplinary teams in developing a psychologically informed understanding of someone's care and also facilitating reflective spaces on how our own personal processes as healthcare professionals can inform the way we work.

Contact details

I undertake private work as an associate with Newby Psychological Services and can be contacted at: info@newbypsychological.co.uk / +44 (0)7759 148284.
